Drawings

The drawings are objected to because many of the boxes in figures 1,2,4,9 are not properly labeled. Reference numerals alone are insufficient. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The substitute specification filed August 8, 2005 has not been entered because it does not conform to 37 CFR 1.125(b) and (c) because: ***a marked-up copy of the substitute specification has not been supplied (in addition to the clean copy).***

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Claim Objections

Claims 4-9 are objected to because of the following informalities: The language set forth in the claims is confusing. For example, claim 4 initially sets forth a step of acquiring data for a first tomogram and then sets forth a first tomogram creating step. It is unclear as to how the two steps differ. It appears that the claims should set forth that tomogram creating step includes acquiring data for creating a first structural tomogram. It is unclear as to how data is "about a tomogram". In the claims the term "radiation detect signal" lacks antecedent basis. The terminology "unbreathed state" and "breathed state" appears to be grammatically incorrect. The recitation of "correction information of a **tomogram**" is confusing. Claim 7 is confusing in that it implies that the same source is used to provide the first and second tomograms which is inconsistent with the disclosure. Appropriate correction is required.

Double Patenting

Claims 4-9 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 10-14 of copending Application No. 10/253,489. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method is an obvious result of using the apparatus.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

Applicant's arguments filed August 8, 2005 have been fully considered but they are not persuasive. Applicant failed to provide corrected figures 1, 2, 4, 9 where all boxes are properly labeled. With regard to the claim objections, many of the terms used are still grammatically incorrect. Applicant merely explained what the terms mean but failed to correct the language used. The portion of the

Art Unit: 3737

specification referred to by applicant with regard to the objection to claim 7 fails to provide the support necessary to correct the problem.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
